**Product Category:** Petrolatum Impregnated Gauze Dressing with 3% Bismuth Tribromophenate

**Description:**
DeRoyal Xeroform Petrolatum Wound Dressing is a sterile, non-adhering primary dressing with 3% Xeroform (Bismuth Tribromophenate) and USP Petrolatum impregnated on a fine mesh gauze.

**Action:**
DeRoyal Xeroform Petrolatum Wound Dressing gauze is a soothing, comfortable, latex safe dressing. The bismuth tribromophenate works to reduce wound odor. DeRoyal Xeroform Petrolatum Wound Dressing easily conforms to the site without sticking to the wound and maintains a moist environment to promote wound healing. The fine mesh gauze is absorbent and prevents the loss of body fluids while protecting the wound from contamination.

**Indications:**
- Surgical incisions
- Donor sites
- Skin grafts
- First and second degree burns
- Lacerations
- Abrasions

**Directions:**
1. Irrigate / Cleanse wound with sterile saline solution or sterile water. Gently dry surrounding skin.
2. Peel open pouch and remove Xeroform Petrolatum Wound Dressing from package.
3. Place dressing directly over wound.
4. Cover with appropriate cover / secondary dressing.
5. Change dressing per physician instructions. Recommended for daily dressing change to maintain a moist, non-adherent environment.
6. Dispose of soiled dressing per institution’s policy.

**WARNINGS AND RISKS:**
- Not recommended for use on infected wounds.
- Should not be used on patients with hypersensitivity to Bismuth Tribromophenate.
