Treatment Choices

The information for this catalog of product choices came from physicians across the country who supplied us with their ICD-10 diagnosis codes and their frequency of use.

DeRoyal averaged this information to come up with the most commonly seen diagnoses in an “average” orthopaedic practice. Based on these very common diagnoses, we linked them to treatment modalities. These treatments were then referenced to orthotic devices and their L-codes (a subset of HCPCS level II codes). This catalog also includes the Average Medicare Reimbursement. This information is taken from the DMEPOS Fee Schedule provided by CMS.

DeRoyal knows that one key to successful treatment is patient compliance, so we are presenting our highest quality devices in this catalog. We strive to develop comfortable, durable products helping to improve patient compliance. We also believe that most physicians cannot support repeated patient visits due to ill-fitted orthotic braces; therefore, we work to make these off-the-shelf products as modular as possible so that they provide the best fit.

Quality has always been a hallmark of DeRoyal® products. We know that innovative, more comfortable materials and well designed products lead to improved function for patients. We hope you find this information relevant in your scope of practice, and we look forward to working with you.

Information related to L-Codes or ICD-10 Codes for use in determining the proper Medicare or Medicaid reimbursement status for any DeRoyal® product listed in this catalog, represents the best efforts of DeRoyal Industries, Inc. in determining relevant L-Codes and corresponding diagnoses for certain of DeRoyal's products. This information is provided as a no-cost service to customers of DeRoyal. The information is compiled from the descriptors and functions associated with the L-Codes and a review of ICD-10 Codes from publicly available information and anecdotal information obtained from sources familiar with the billing process as indicated above. However, only the appropriate Medicare authority can ultimately determine the appropriateness of reimbursement of a particular product, for a particular patient, given the appropriate diagnosis. **DeRoyal strongly cautions the users of this information to verify the applicability of a given L-Code and/or ICD-10 Code in a particular situation prior to seeking reimbursement for a DeRoyal® product.**
